

Model Questions and Answers

Model -1

- The determination of serum amylase is useful in**
[Acute Pancreatitis]
- In the post Community Health Nursing was known as**
[Public Health Nursing]
- is a common disinfectant used in the hospital.**
[Sodium hypo-chlorite]
- Deficiency disease of iodine is**
[Goitre]
- Scurvy is caused by the deficiency of....**
[Vitamin]
- splits fats into fatty acids and glycerol**
[Lipase]
- Small pox vaccine was discovered by...**
[Edward Jenner]
- The needs of the staff or graduate nurse are different from those of student nurses.**
[Educational]
- BCG is a vaccine.**
[Live]
- P.V.O. is related to**
[Blood culture]
- Agent of plague**
[using larvicides like paris green]
- Each kidney is having the glands situated above the kidney.**
[DNA sequences]
- Fat free diet is ordered in cases.**
[Jaundice]
- Oncogenes are**
[DNA sequences]
- Gastric ulcer is common in**
[Blood group]
- The drug of choice in status epilepticus is**
[millilitres]
- Father of communicable disease is**
[John Snow]
- Which test is used for the detection of AIDS?**
[ELISA]
- According to the equivalents used in converting dosages, 1 fluid ounces is approximately equal to**
[30 millilitres]
- The instrument used for ear examination is**
[Otoscope]
- is weight per unit volume of a substance.**
[Density]
- The digestive fluids of are moderately alkaline in nature.**
[small intestine]
- Normal atmospheric pressure is**
[76 cm of Hg]
- The megaloblastic erythropoiesis is due to the deficiency of**
[Vitamin B₁₂]
- Techniques employed in open heart surgery is**
[Hypothermic]
- Cerebral oedema is due to the increased amount of**
[water]
- The best mosquito anti larval measure is**
[using larvicides like parisgreen]
- Transmission of Hepatitis B virus infection usually occurs through**
[blood]
- The length of oesophagus is**
[25-30 cms]

30. Osteomyelitis is commonly seen in
[children]
31. Nursing history began at where
the mother took care of the sick.
[home]
32. The essential thing for regulation of
neuro muscular irritability and
capillary permobility?
[Ca]
33. Esophagus is lined by
[Stratified squamous epithelium]
34. The water contains in amniotic fluid
is
[99%]
35. The essential observation required
before administering digoxin is
[pulse]
36. Which part of the alimentary canal the
calcium is absorbed?
[intestine]
37. Gangrene means
[Death of tissue]
38. Hydrophobia is otherwise known as...
[Rabies]
39. The world AIDS day is celebrated every
year on
[December]
40. Organic chemistry is a study of
[Carbon and its compounds]
41. The Hall mark of CHF is
[Paroxysmal nocturnal dyspnoea]
42. The normal pH of blood is
[7.35-7.45]
43. Nickel and cobalt are element which
have properties of
[Ferromagnetic]
44. In patients with renal failure which
type of diet is advised
[Low protein diet]
45. In hypermetropia the image of an
object is formed in
[Behind retina]

46. The withdrawal symptoms of
alcoholism is
[Violent behaviour, Nause and watering
of eyes]
47. Pus in the urine is called
[Pyuria]
48. Rule of Nine is
[Burns]
49. IVP is
[X-Ray of kidney]
50. developmental malformation of
blood vessels.
[Arteosclerosis]

Model -2

1. Medical Termination of pregnancy Act
was passed in
[1971]
2. BCG vaccine is given to prevent
[Tuber culusis]
3. When the amount of flourine is very
high it affects the
[Teeth]
4. Subdural haemorrhge is a collection of
blood between
[Dura and arachnoid]

| <p>10. Study of properties of electric charges at rest is
[Electrostatics]</p> <p>11. Jaundice affects
[Liver]</p> <p>12. Mumps affect gland.
[Salivary]</p> <p>13. One ounce measures CC.
[30 CC]</p> <p>14. Blood group of universal donor is
[O]</p> <p>15. The longest and strongest bone in human body
[Femur]</p> <p>16. The food group lowest in natural sodium is
[Fruits]</p> <p>17. Pulse rate is measured from
[Artery]</p> <p>18. Alopecia is a side effect of
[Cancer Chemotherapy]</p> <p>19. AIDS virus contains
[RNA + protein]</p> <p>20. Vagotomy is done along with pyloroplasty to
[Eliminate pain sensation]</p> <p>21. Any measurement has
[Two components]</p> <p>22. BCG vaccine should be stored at °C temperature.
[2 to 8]</p> <p>23. Symptoms of fever, vomiting, neck stiffness indicate
[menyitis]</p> <p>24. The vitamin which is essential maturation of red blood corpuscles is...
[Vitamin C]</p> <p>25. As per Fahrenheit scale the freezing point of water is
[32°F]</p> <p>26. Trismus is caused by
[Tetanus]</p> | <p>27. The nurse should administer a nasogastric tube feeding slowly to reduce the hazard of
[Flatulence]</p> <p>28. Sputum slide is used for the detection is
[Tuberculosis]</p> <p>29. A strong feeling of the degree of
[Density]</p> <p>30. Whatever the type of institution the nurse needs to establish with different poeple.
[Good relationship]</p> <p>31. enema is given to stop diarrhoea
[Starch opium]</p> <p>32. Pulmonary circulation is the circulation of blood through
[Lungs]</p> <p>33. The sites where pulse can be felt is
[Radial artery, carotid and temperal]</p> <p>34. The normal respiratory rate per minute is
[16]</p> <p>35. concentration of sodium chloride is our blood (plasma) per 100 ml is
[0.9%]</p> <p>36. The identify of the patient is the bed number and the
[Register number]</p> <p>37. The disese caused by excess amount of cortisone is
[Cushing's syndrome]</p> <p>38. Haematemesis is
[Portal hypertension]</p> <p>39. The most reliable source of personal data is the himself.
[patient]</p> <p>40. The 'master gland' of the body is
[pituitary]</p> <p>41. Ultrasonic waves have a frequency....
[Greater than 20,000 HZ]</p> |
|--|---|

42. **Cancer is**
[Uncontrolled division of cells]
43. **Hypertension is one of the features of...**
[Acute Nephritis]
44. **In reference to fat the term saturated and unsaturated relate to degree of...**
[density]
45. **How many antigens are involved in rhesus blood group?**
[6]
46. **Normal rate of respiration for an adult is**
[16 to 20 breaths/min]
47. **Bed sores are common over region**
[Sacral]
48. **In children under 2 years. Whooping cough often leads to**
[Gastroenteritis]
49. **An active source of powerful gamma rays**
[Cobalt-60]
50. **Essential aminoacid is**
[Leucine]

Model - 3

1. **Deficiency of sodium causes**
cramps
[Muscular]
2. **The only food item which does not contain high amount of iron is**
[Rice]
3. **After immobilization of fractured mandible with wires, the life threatening problem that can develop postoperatively is**
[vomiting]
4. **Clay coloured stools are seen in**
[Obstructive jaundice]
5. **The term used for excessive salivation is**
[Ptyalism]

6. **Oxygen normally is given at the rate of litre per minute.**
[4 to litre/minute]
7. **Which of the following is a fly-borne disease**
[Amoebiasis]
8. **The sedative-hypnotic which causes gut irritation is**
[Chloral hydrate]
9. **The wave of relaxation-contraction along esophagus that propels food along the digestive tube is called**
[Peristalsis]
10. **The population of India as aon 2001 census in crores is**
[102.7]
11. **Passing of tarry stools is known as**
[Melaena]
12. **The following are the social problems except**
[Malnutrition]
13. **Pheochromocytoma is the tumour of...**
[Pituitary gland]
14. **Abnormal crescent shaped erythrocytes are present in**
[Sickle cell anaemia]
15. **The presence of fresh blood in stools is called as**
[Hematochezia]
16. **Study of properties of electric charges at rest is**
[Electrostatics]
17. **Vasodilation occurs first in**
[Arterioles]
18. **First booster does of polio vaccine and triple antigen are given at the age of** years.
[1½ to 2]
19. **The main protein content of transudate is**
[Albumin]
